Introducing the new Sony 100 Series

Featuring Network Capability

Models: VPL-CX125, VPL-CX155, VPL-CW125

With a new WIRED network presentation ability. Once connected to your building's internal LAN, you can project images and control the projector's functions from anywhere in the building or even on the WEB. No longer do you need to install dozens of laptop "VGA" plug-in's for people to use the projector, just connect to your LAN and present. Using any off the shelf wireless access point you can even present wirelessly!

Sony 100 Series projectors feature:

- New efficient air flow design for better cooling
- Battery backup - cooling fan works when unplugged
- Password authentication, panel lockout & new security bar
- Easy air filter cleaning & Lamp replacement doors
- NEW "ACF" advanced Crisp Focus lens
